

StewartFloat® Tin Bath

Stewart Engineers is the world leader in Tin Baths

 **StewartFloat®**

Over the past 36 years, 23 proven StewartFloat® Tin Baths have been installed worldwide, all of which are operational today. StewartFloat® Tin Baths are producing glass as thin as 0.12 mm and as thick as 25 mm. Stewart Engineers' Tin Baths integrate seamlessly with AcuraCoat® Online CVD Coating System.

Customers have the ability to specify tonnage, thickness, ribbon-width, automation level, and online CVD coating requirements to suit their market needs. Stewart Engineers draws upon 36 years of glass engineering to deliver superior tin baths and services to the glass industry.

StewartFloat® Features

CVD Coating Integration

Process Automation

- Pool Control
- Temperature Control
- Cross Ribbon Temperatures

Excellent Optical Quality

Zone Atmosphere Control

Atmosphere Circulation Control

Equipment Installation

Operational Commissioning & Assistance

Available StewartFloat® Tin Baths

Glass Composition	Soda lime, Ultra-clear, Borosilicate, Aluminosilicate
Glass Tonnage	50 - 1200 MTPD
Glass Thickness	0.12 - 25 mm

Engineered to fulfill your needs
