

Turnkey Services

Building Excellence with Stewart's Turnkey Solutions

Stewart Engineers delivers comprehensive Turnkey services including engineering, procurement, and construction management to ensure seamless project execution. Training and commissioning services are provided to equip teams for smooth operations, along with ongoing operational and product support to maintain long-term performance. Additionally, sales and marketing services are available to strengthen market presence and drive business success. Stewart ensures dedicated support throughout every stage of the project.

About Stewart Engineers

Stewart Engineers, established in 1986, is a privately held, family-owned company headquartered in North Carolina, USA. Specializing in the design and construction of proprietary glass making equipment for melting, forming, and coating, as well as complete turnkey factories, Stewart is the leading choice for independent glass manufacturers worldwide, with over 100 references globally.

Stewart is the only provider of turnkey float factories with Online CVD glass coating systems.

Engineering, Procurement, & Construction

Turnkey projects include engineering, procurement, and construction services. Stewart reduces the total cost of a project by 10-20% through the following strategies:

- Single point of contact
- Lower overhead cost
- Qualified vendor selection
- Expediting logistics and inspection services
- Document control
- Faster project delivery

Training, Commissioning, & Operational Support

- Equipment and operational training
- Heat-up and commissioning
- Debugging and problem solving
- Performance tests including yield optimization
- Additional operational support available

Sales & Marketing Services

- Feasibility studies
- Market research
- Operations and cash flow analyses
- Off take agreements
